

WORKSHOP

The purpose: To exchange and share information about mosquito-borne disease and vector mosquito population surveillance data, review recent developed techniques for surveillance and control of mosquitoes, and provide training for professional employees.

Who Should Attend: Mosquito control directors/Administrators, Commissioners, Entomologists/Biologists, Epidemiologists, mosquito control technicians/workers, field inspector/sprayers/technicians, public health workers, and Veterinarians.

Registration and Materials: \$50.00 per day, 3 day session for \$150.00, includes workshop programs and materials, working lunches (3), and refreshment during break, as well as 1 dinner. Cash, money order, or check will be accepted for the registration fee. You can also utilize Paypal for making payment.

Please make your check payable to: **"AMCD" and write in "15th Annual Workshop"**.

2018 WORKSHOP
THE AMCD's 15th Annual
ARBOVIRUS SURVEILLANCE AND MOSQUITO CONTROL WORKSHOP,
in conjunction with the Northeast 1443 Regional Project's 4th Annual Meeting
is being held at AMCD's new Base Station Complex:
Anastasia Mosquito Control District of St. Johns County
120 EOC Drive
St. Augustine, FL 32092
(904) 471-3107

March 20 - 22, 2018

The joint workshop and meeting is being sponsored by
AMCD, USDA/CMAVE, and the NE 1443 Regional Project Committee

The Keynote Speaker will be Dr. Theodore G. Andreadis, Director,
the Connecticut Agricultural Experiment Station,
Center for Vector Biology and Zoonotic Diseases,
123 Huntington Street, New Haven, CT 06511.

His Presentation Title: Reflections on the Ecology and Epidemiology of Mosquito-borne Viruses in Connecticut: An Analysis from 20 Years of Research and Surveillance.

Dr. Ashwani Kumar, Officer-in-Charge, ICMR- National Institute of Malaria Research, GOA, India and Dr. Mustapha Debboun, Director of Mosquito Control Division, Harris County, Houston, Texas will be the GUEST SPEAKERS concerning their programs.

Dr. Dawn Allcock, Director, Department of Health, St. Johns County will give a presentation about Health Service Excellence in St. Johns County, Florida during the Tuesday Dinner.

The sessions will include Arbovirus, especially the Zika response report, mosquito control response after the hurricane, new technology and methods for attractant, trapping and repellency, and insecticide and control methods.

There are more than 50 presentations in the three day workshop.
